🌐 Odessa

Summary

I began my career in Quality Assurance before transitioning into front-end development. I advanced my skills by studying JavaScript and TypeScript, specializing in the React framework. For the past two years, I have been working as a Front-End Developer at Gromus AI, contributing to the development of web applications. I am highly motivated, committed to continuous learning, and eager to enhance my expertise in front-end development.

Technical Skills

- **Programming:** JavaScript, TypeScript
- **Front-End:** ReactJS, NextJS, HTML5, CSS, Bootstrap, Tailwind, Shadcn, Mantine, Framer Motion, Resend
- **Databases:** MS SQL Server, MySQL, PostgreSQL
- **API Testing:** Postman, Swagger
- **Version Control:** Git
- **Software Testing:** Test case creation, Automation testing, Bug reporting

---

Soft Skills

- Strong organization skills
- Effective teamwork and collaboration
- Creative problem-solving

Languages

- **English:** B1
- **Ukrainian:** Native

Education

Odessa National Polytechnic University
Master's Degree in Economic Cybernetics (February 2013)

Professional Experience

Front-End Web Developer

📍 [Gromus AI](#) • August 2023 – Present

- Developed and maintained responsive web applications using React, JavaScript, and TypeScript.
- Implemented reusable React components to optimize performance and maintainability.
- Integrated state management solutions such as Zustand for efficient application state handling.
- Utilized React Query for optimized data fetching, caching, and synchronization with APIs.
- Designed and implemented UI/UX features using HTML5, CSS, and modern styling libraries.
- Ensured code quality and version control through Git, following best practices in branching and code reviews.

QA and Data Analyst

📍 [Gromus AI](#) • January 2023 – August 2023

- Developed and executed comprehensive test cases to ensure the quality and functionality of Gromus software.
- Identified, documented, and tracked software defects, providing timely reports to the development team.
- Collaborated with the development team to ensure the timely resolution of identified issues.
- Developed API collections and ran automation tests via Postman CLI, integrating them into CI/CD pipelines.
- Created and maintained API documentation using Swagger, Postman, and Confluence.
- Participated in the development of testing strategies and methodologies.
- Collected, cleaned, and analyzed data for reports using PostgreSQL and Microsoft SQL Server.

QA Engineer

📍 [FlaiData](#) (TikTok Analytics) • May 2022 – December 2022

- Ensured overall project quality by conducting thorough testing and validation.
- Designed and executed checklists to verify functionality, performance, and UI consistency.
- Identified, documented, and tracked defects using Jira, ensuring clear communication with the development team.
- Performed API testing with Postman, validating request/response structures and detecting integration issues.
- Investigated and fixed UI bugs, improving user experience and front-end performance.
- Assisted with various front-end tasks, including UI improvements and minor feature implementations.
